

Rec'd PCT/PTO 14 MAR 2005

ABSTRACT OF THE DISCLOSURE

Back of a watch case including a cover (4) that defines the external surface of the back, and a false back (11) that is mounted against the internal surface of the cover. The false back can be provided with an engraved decoration and can be manufactured by stamping from a plate of even thickness. A transponder can be housed between the cover and the false back.
